NETSTOCK | Predictive Planning Suite™

Netstock's Predictive Planning Suite™ is a cloud-based supply chain planning solution that offers robust functionality to meet the demands of small and medium sized businesses. In an era of increasing supply chain volatility, our Predictive Planning Suite provides the tools that give our customers the agility and insights to proactively respond to supply chain disruptions. Our **Predictive Planning Suite** offers you the functionality to meet your demands throughout your supply chain planning journey… from simplistic to complex, Netstock has you covered. Whether your business needs to optimize inventory or align supply and demand, Netstock's solutions allow businesses to recalibrate and react rapidly, minimizing the negative impact of supply chain disruptions, often within days, not months.

Netstock Predictor leverages our **Pivot Forecasting**® engine. This robust AI-infused, ML-based predictive engine provides the same forecasting power as inventory planning systems built for enterprise organizations. The predictive analytics provided by Predictor gives you the visibility and knowledge you need to unlock operating cash through better inventory management, affording you the ability to invest in high-performing profitable products. Businesses can recognize ROI from day one of implementation by reducing stock-outs, minimizing safety stock, and deploying efficient and effective replenishment plans.

In addition, we offer Predictor PLUS modules that provide enhanced expert functionality to our suite, and provide solutions that align your supply and demand with enhanced sales & operations planning capabilities. Learn more about our Predictive Planning Suite.
